

the
Sungarden

The Sungarden is the strongest do-it-yourself greenhouse available.

With exceptional design that boosts energy efficiency, the Sungarden hobby greenhouse kit is built with unbreakable polycarbonate glazing that withstands heavy snow loads and 80 mph winds.

Strength

- The Sungarden is designed to withstand the heaviest snow loads and highest winds
- Our DIY build plans include heavy aluminum frame spaced every 2 feet for maximum versatility and durability
- Unbreakable 6mm twinwall polycarbonate glazing

Exceptional Quality

- Built by gardeners with over 60 years of hobby greenhouse experience
- The longest most comprehensive warranty you can count on

Maximize Your Growing Space

- 8x8 provides 75% more growing space than typical 6x8's
- Taller sidewalls, ideal for hanging baskets and tall plants
- Extra width to accommodate larger benches

Energy Efficient

- Cooler in summer, insulated panels for heat retention in winter
- Extra-large roof vent for ventilation
- Solar powered vent control opens when you're not home
- Adjustable screened glass door panel for additional air flow
- Twinwall glazing diffuses light to protect plants from burning
- 50% more energy efficient than single pane glass and plastic film greenhouses

Even More Benefits:

- Extension Kit available to increase size at later date for even more growing space
- Premium lockable, maintenance free storm door
- Eyehooks for hanging baskets and accessories
- Clearly labelled parts and easy to follow DVD + written
- Instructions for trouble free installation
- Wood crated for safe delivery and shipped directly to your home (call for rates)
- Unbeatable warranty and best technical support in the industry!

Designed by gardeners - this greenhouse is built for generations!
